

Survey Results

The following results were collected online and at a public meeting held on January 28, 2015. There were six total responses.

Public Comments

1. Great Project! The design is good- path width of 10 ft. will accommodate path users well. I wish there was a way to keep it 10 ft. under Priest, but I understand that would not be cost effective given the constraints in that area. I'm so glad your received a federal grant to save local money!
2. Looks like a good project. Very non-intrusive.
3. Excited about the possibility of this turning into a major thoroughfare in addition to a local connection and amenity for runners, recreational cyclists, and rollerbladers. Awesome commitment to the character of Tempe.
4. Excellent community improvement. I can't wait to see the evolution of this area. Additions that would make this more user-friendly: water fountain, restroom facility, signage with distances to attractions.
5. You're doing a great job! Some vegetation and/or public art would be nice. Also if you can make some shade with that vegetation + art that would be cool too.
6. Consider installing pathway off southbound Priest sidewalk so people traveling southbound can access teh trail without backtracking.
